Key Technologies and Characteristic Mode Analysis Methods for 5G Base Station Antennas

A Master Thesis Submitted to
University of Electronic Science and Technology of China

Discipline **Electromagnetic Field and**
Microwave Technology

Student ID **2017XXXXXXXX**

Author **Zhang Mou**

Supervisor **Prof. Li Moumou**

School **School of Electronic Science and Engineering**

独创性声明

本人声明所呈交的学位论文是本人在导师指导下进行的研究工作及取得的研究成果。据我所知，除了文中特别加以标注和致谢的地方外，论文中不包含其他人已经发表或撰写过的研究成果，也不包含为获得电子科技大学或其它教育机构的学位或证书而使用过的材料。与我一同工作的同志对本研究所做的任何贡献均已在论文中作了明确的说明并表示谢意。

作者签名：_____ 日期：_____ 年 _____ 月 _____ 日

论文使用授权

本学位论文作者完全了解电子科技大学有关保留、使用学位论文的规定，同意学校有权保留并向国家有关部门或机构送交论文的复印件和数字文档，允许论文被查阅。本人授权电子科技大学可以将学位论文的全部或部分内容编入有关数据库进行检索及下载，可以采用影印、扫描等复制手段保存、汇编学位论文。

（涉密的学位论文须按照国家及学校相关规定管理，在解密后适用于本授权。）

摘 要

本文档使用 UESTC Thesis 模板编译生成，用于展示电子科技大学学位论文的基本结构与排版效果。

本文档涵盖中英文摘要、章节层次、数学公式、图表、文献引用、主要符号表、缩略词表、附录及攻读学位期间取得的成果等常用内容。文中的文字、数据和图表仅供排版演示，使用者可根据实际论文内容进行修改或替换。

不同学科的学位论文在内容组织和写作方式上有所不同。使用者可通过中国知网、万方数据等学术数据库查阅本学科的优秀学位论文，了解常见的内容组织与表达方式。论文格式应以电子科技大学研究生院发布的学位论文撰写规范及相关模板为准，相关文件可从以下网址获取：<https://gr.uestc.edu.cn/xiazai/114/3917>。本模板依据学校最新规范及官方 Word 模板设计，对其主要结构与版式进行了高精度复刻，使用者可放心用于论文写作与排版；正式提交前，仍应结合所在学院的具体要求进行最终核对。

关键词：电子科技大学；学位论文；LaTeX 模板；论文排版

ABSTRACT

This document is compiled using the UESTC Thesis template to demonstrate the basic structure and typesetting of dissertations and theses at the University of Electronic Science and Technology of China.

It covers Chinese and English abstracts, heading levels, mathematical equations, figures, tables, citations, lists of symbols and abbreviations, appendices, and academic achievements during the degree program. The text, data, and figures are provided solely for typesetting demonstration and may be modified or replaced according to the user's thesis.

The organization and writing conventions of dissertations and theses vary across disciplines. Users may consult outstanding dissertations and theses in their fields through academic databases such as CNKI and Wanfang Data to learn common approaches to organization and scholarly expression. Thesis formatting should follow the latest writing standards and related templates published by the UESTC Graduate School, available at <https://gr.uestc.edu.cn/xiazai/114/3917>. Based on these official documents and Word templates, the UESTC Thesis template reproduces their principal structure and layout with high fidelity and can be used confidently for thesis writing and typesetting. Before final submission, users should nevertheless confirm any additional requirements issued by their school or department.

Keywords: UESTC; Dissertations and Theses; LaTeX Template; Thesis Typesetting

Contents

Chapter 1 Template Usage Example	1
1.1 Document Configuration	1

Chapter 1 Template Usage Example

This document briefly introduces the main features of the template. For more detailed instructions, see the Markdown user guide, `GUIDE.md`, in the project directory.

1.1 Document Configuration

Edit `main.tex` to set the degree type, title, author information, and other options:

- Degree type: use `master` for a master's thesis and `doctor` for a doctoral dissertation;
- Thesis language: download the Chinese or English package; each package uses `main.tex`.

Import the cover, Chinese and English title pages, and declaration page as follows:

1. Download the appropriate Word template: <https://gr.uestc.edu.cn/xiazai/114/3917>
2. Enter the thesis information;
3. Export the cover and Chinese and English title pages as `cover.pdf`, then replace the file of the same name in the project. To replace the declaration of originality and authorization page, scan the signed page as `declaration.pdf` and replace the corresponding project file.

1.2 Thesis Structure

A dissertation/thesis consists of preliminary pages, the main text, and final pages. Their components and order are shown in Table 1-1.

1.3 Second-Level Heading

1.3.1 Third-Level Heading

1.3.1.1 Fourth-Level Heading

Regular text, **bold text**, *italic text*, and underlined text.

Table 1-1 Basic Structure of a Degree Dissertation/Thesis

Component	Contents	Component	Contents
Preliminary Pages	1. Cover Page	Main Text	1. Introduction (Chapter 1)
	2. Chinese and English Title Page		2. Body of Dissertation/Thesis
	3. Statement and Authorization		3. Conclusion (last Chapter)
	4. Abstract in Chinese and English	Final Pages	1. Acknowledgements
	5. Contents		2. References
	6. Figures and tables (if necessary)		3. Appendix (if necessary)
	7. Symbols, Acronyms, etc. (if necessary)		4. Research Results

Note: Components marked “if necessary” may be included according to the thesis and disciplinary conventions. To omit a component, comment out its input command in `main.tex`. For example, omit the list of symbols with `%\input{chapters/symbols}`.

1.4 Mathematical Expressions

Let the constant π and scalar θ satisfy $\theta = \pi/2$. A vector $\mathbf{x}$ is transformed by a matrix $\mathbf{A}$ into a vector $\mathbf{y}$, as shown in (1-1).

$$\mathbf{y} = \mathbf{A}\mathbf{x}. \quad (1-1)$$

Here, $\mathbf{y}$ is the output vector, $\mathbf{A}$ is the transformation matrix, and $\mathbf{x}$ is the input vector.

1.5 Theorems and Proofs

Definition 1.1 A matrix $\mathbf{A}$ is orthogonal if $\mathbf{A}^T\mathbf{A} = \mathbf{I}$.

Theorem 1.2 An orthogonal matrix preserves the Euclidean norm of a vector.

Proof Since $\mathbf{A}^T\mathbf{A} = \mathbf{I}$, $\|\mathbf{Ax}\|_2^2 = \mathbf{x}^T\mathbf{A}^T\mathbf{Ax} = \mathbf{x}^T\mathbf{x} = \|\mathbf{x}\|_2^2$. ■

1.6 Figures

Figure 1-1 shows the UESTC visual identity.^①

① When a cross-reference to a figure, table, or theorem is followed by text, retain a normal space after the command, for example between `\autoref{fig:uestc-logo}` and “shows.” Omit the space before punctuation.

Figure 1-1 UESTC Visual Identity

Note: This sentence demonstrates the figure-note style.

1.7 Citations and Cross-References

Table 1-1 demonstrates the three-line table and table-note styles. Common source types include journal articles^[1], international conference papers^[2], books^[3], and arXiv preprints^[4].
